PROFESSIONAL SUMMARY

Data and AI professional with over 2 years of hands-on experience in analytics, combined with extensive leadership background across telecommunications, government, and nonprofit sectors. Experienced in building data pipelines, developing dashboards, and delivering AI-driven solutions that improve decision making and operational efficiency. Strong technical foundation in Python, SQL, and Power BI, with practical experience in machine learning, automation, and full-stack application development. Proven ability to translate complex data into clear business insights and work effectively with both technical and non-technical stakeholders.

KEY SKILLS

Data Analysis	Power BI, DAX, Tableau, Looker Studio, Advanced Excel, Power Query, SQL, KPI Development, Data Modelling
AI and Automation	Python, Pandas, Scikit-learn, RAG, LangChain, OpenAI GPT-4, Pinecone, Prompt Engineering, GA4, GTM
Data Engineering	BigQuery, ETL Pipelines, API Integration, Data Transformation, Git, Cloud Deployment (Netlify, Render)
Development	React, FastAPI, MongoDB, Electron, Dashboard Development, Automation Tools
Business Leadership	Key Account Management, Sales Management, Stakeholder Engagement, Digital Transformation, Process Improvement, Strategic Planning, Cross-functional Collaboration and Project Management

PROFESSIONAL EXPERIENCE

Data Engagement Analyst | Aberdeen Cyrenians, UK *March 2024 - Present*

- Lead data analysis and reporting initiatives to support service delivery, operational performance, and strategic decision making.
- Develop dashboards and analytics solutions using Power BI, Looker Studio, and GA4 to provide insights into user behaviour and service outcomes.
- Design and implement automated data collection and transformation processes, improving efficiency and reducing manual workload.
- Conduct data quality assessments and system reviews to improve data governance and reporting accuracy.
- Collaborate with stakeholders across technical and non-technical teams to translate business requirements into data solutions.

Data Analyst (Contract) | Ask Enact Project – Aberdeen Cyrenians / N6 Technology *January 2026*

- Conducted a comprehensive data quality assessment of multi-source service datasets supporting an AI-driven homelessness prevention platform.
- Developed a structured scoring framework to assess data quality and usability across critical fields.
- Mapped service categories to risk drivers and produced analytical reports supporting strategic product decisions for system development.

Power BI Consultant | Sales Analytics Project (Freelance)

- Designed and delivered an executive Power BI dashboard analysing revenue performance, customer trends, and regional insights.
- Developed structured data models and KPIs to support decision making and business reporting.
- Translated complex datasets into clear, actionable insights for non-technical stakeholders.

Zonal Head, Enterprise Group Southwest | Globacom Limited, Nigeria *2013 - 2023*

- Led regional sales and customer strategy, managing large teams and driving sustained business growth across southwest Nigeria.
- Increased annual revenue by over 50 percent through data-informed decision making and targeted customer engagement strategies.
- Implemented analytics-driven approaches to improve customer retention rates and operational performance.

Senior Legislative Aide | National Assembly, Nigeria *2011 - 2013*

- Conducted research and analysis to support legislative decision making and stakeholder engagement at federal level.

Business Operations and Product Development | Phase3 Telecoms, Nigeria *2009 - 2011*

- Supported business expansion through market analysis, product development, and strategic planning initiatives.

SELECTED PROJECTS

GA4 to BigQuery Analytics Pipeline | Aberdeen Cyrenians

- Designed and implemented an automated analytics pipeline integrating GA4 event data with BigQuery and Power BI dashboards.
- Developed SQL-based data models and funnel analysis reports to track user engagement and conversions.
- Reduced manual reporting effort by 80 percent and improved visibility into user behaviour and content performance.

Warehouse Donation Manager | Aberdeen Cyrenians

- Developed a desktop application automating donation data processing across 10,000 plus records using Electron.
- Built a structured ETL pipeline with intelligent data validation and transformation logic, achieving 99.9 percent data accuracy.
- Reduced manual data entry by over 15 hours per week while ensuring full GDPR compliance.

Staff Rota Workforce Scheduling System | Full-Stack Application

- Designed and built a full-stack rota management system using React, FastAPI, and MongoDB.
- Enabled staff scheduling, calendar views, and automated reporting, replacing manual Excel-based processes.
- Improved workforce planning capability and operational efficiency across the organisation.

CRM Data Optimisation and Reporting | Aberdeen Cyrenians - PLINTH Platform

- Led analysis and resolution of data quality and reporting issues across a multi-service CRM platform.
- Developed structured workflows and collaborated with engineering teams to improve KPI reporting accuracy.
- Improved practitioner confidence in data usage and reliability of service outcome reporting.

Charity Donation Predictor | Machine Learning Model

- Developed a forecasting model using Python and Ridge regression to predict monthly donation trends.
- Applied feature engineering and cross-validation techniques to improve model accuracy and robustness.
- Supported data-driven fundraising decisions through clear presentation of model outputs.

EDUCATION

MSc Business Analytics (Distinction) | Robert Gordon University, UK

Dissertation: AI Powered Multilingual Legal Advisory Chatbot - developed using RAG architecture combining GPT-4, Pinecone vector database, and LangChain for legal information retrieval across UK jurisdictions.

Masters in Managerial Psychology | University of Ibadan, Nigeria

BSc Mathematics | Lagos State University, Nigeria

ADDITIONAL INFORMATION

Technical Interests	AI applications in business, data-driven decision systems, analytics automation, and digital transformation
Volunteering	Active involvement in community support and mentoring initiatives
