PROFESSIONAL SUMMARY

Data and AI professional combining over 15 years of senior leadership experience with two years of focused, hands-on analytics work in the UK charity and public sector. Since transitioning into data, I have built automation tools, developed Power BI dashboards, designed ETL pipelines, and delivered AI-powered applications, including a multilingual RAG chatbot built as an MSc dissertation proof of concept. Technical skills span Python, SQL, Power BI, and applied machine learning. Equally comfortable in governance and pipeline design as in stakeholder reporting and insight delivery, the focus is always on turning data into decisions that get used.

KEY SKILLS

Data Analysis	Power BI, DAX, Tableau, Google Looker Studio, Advanced Excel, Power Query, SQL, KPI Development, Data Modelling
AI and Automation	Python, Pandas, Scikit-learn, RAG Architecture, LangChain, OpenAI GPT-4, Pinecone, ChromaDB, Prompt Engineering, GA4, GTM
Data Engineering	BigQuery, ETL Pipeline Design, API Integration, Data Transformation, Git, Cloud Deployment (Netlify, Render)
Data Governance	Data Quality Assessment, Information Governance, GDPR Compliance, Data Catalogue Management, ETL Framework Design, Metadata Standards
Development	React, FastAPI, MongoDB, Electron, Streamlit, Dashboard Development, Automation Tools
Business Leadership	Key Account Management, Stakeholder Engagement, Digital Transformation, Process Improvement, Strategic Planning, Cross-functional Collaboration, Project Management

PROFESSIONAL EXPERIENCE

Data Engagement Analyst | [Aberdeen Cyrenians, UK](#)

March 2024 - Present

- Led data analysis and reporting across multiple service arms, supporting operational performance tracking and strategic planning.
- Built and maintained dashboards in Power BI, Looker Studio, and GA4 to give clear visibility into service outcomes and user behaviour.
- Designed and implemented an automated GA4 to BigQuery analytics pipeline, reducing manual reporting effort by 80 per cent.
- Conducted data quality assessments and contributed to information governance frameworks, including GDPR-aligned data handling practices.
- Worked with technical and non-technical stakeholders to translate business requirements into practical, scalable data solutions.

Data Analyst (Contract) | [Ask:Enact Project, Aberdeen Cyrenians / INIT6 Technology](#)

January 2026

- Assessed data quality across multi-source service datasets underpinning an AI-driven homelessness prevention platform.
- Developed a structured data governance framework and scoring methodology to evaluate field-level data usability.
- Mapped service categories to risk drivers and produced analytical reports that directly shaped product development decisions.

Power BI Consultant | [Sales Analytics Project \(Freelance\)](#)

2024

- Designed and delivered an executive-level Power BI dashboard covering revenue performance, customer trends, and regional breakdowns.
- Built structured data models and KPI frameworks tailored to client reporting requirements and business objectives.
- Translated complex datasets into clear, actionable findings for non-technical senior stakeholders.

Zonal Head, Enterprise Group Southwest | [Globacom Limited, Nigeria](#)

2013 - 2023

- Led regional enterprise sales and customer strategy across southwest Nigeria, managing large cross-functional teams.
- Grew annual revenue by over 50 per cent through data-informed customer engagement and targeted commercial strategies.
- Applied analytics to improve customer retention and operational performance across a high-volume B2B portfolio.

- Conducted research and analysis supporting legislative decision-making and stakeholder engagement at federal level.

- Supported business expansion through market analysis, product development, and strategic planning initiatives.

SELECTED PROJECTS

AI Legal Advisory Chatbot (MLAC) | MSc Dissertation

- Built a multilingual RAG chatbot providing UK criminal law guidance across England & Wales, Scotland, and Northern Ireland in English and French.
- Implemented a full pipeline from PDF extraction and chunking through to OpenAI embedding, Pinecone indexing, and GPT-4 response generation.
- Achieved a 98.8 per cent UAT pass rate across 10 participants including legal professionals, law students, and law enforcement officers.
- Tech: Python, Streamlit, LangChain, GPT-4, Pinecone, DeepL, OpenAI Embeddings | github.com/Debo-Odufuwa/MLACprime

LexRAG | Ask:Enact Project, Aberdeen Cyrenians

- Designed and built a governed RAG chatbot enabling frontline housing and social care workers to query Scottish legislation in plain English.
- Developed as part of a formal data governance framework with documented ETL workflows, a three-tab data catalogue, and structured metadata standards.
- Tech: Python, Streamlit, ChromaDB, GPT-4o-mini, GitHub.

GA4 to BigQuery Analytics Pipeline | Aberdeen Cyrenians

- Designed and implemented an automated pipeline integrating GA4 event data with BigQuery and Power BI, cutting manual reporting by 80 per cent.
- Developed SQL-based data models and funnel analysis reports to track user engagement and content performance.

Warehouse Donation Manager | Aberdeen Cyrenians

- Built a desktop application automating donation data processing across 10,000-plus records using Electron, achieving 99.9 per cent data accuracy.
- Saved over 15 hours of manual entry per week with a structured ETL pipeline and intelligent validation logic, fully GDPR compliant.

Staff Rota WH v1.3 | Whernham House | Aberdeen Cyrenians

- Designed and built a full-stack cloud-hosted workforce scheduling platform using React, FastAPI, and MongoDB Atlas, replacing manual spreadsheet-based rota management entirely.
- Delivered JWT authentication, role-based access, automated monthly rota duplication, calendar visualisation, bulk shift operations, and PDF export in a single integrated system.
- Managed end-to-end delivery from requirements through to production deployment on Netlify and Render, improving scheduling accuracy and cutting administrative overhead significantly.

Charity Donation Predictor | Machine Learning Model, Aberdeen Cyrenians

- Developed a Ridge regression forecasting model in Python to predict monthly donation trends, supporting data-driven fundraising decisions.

EDUCATION

MSc Business Analytics (Distinction) | Robert Gordon University, UK | 2022 - 2024

Dissertation: AI-powered multilingual legal advisory chatbot using RAG architecture combining GPT-4, Pinecone, and LangChain for legal information retrieval across UK jurisdictions.

Masters in Managerial Psychology (MMP) | University of Ibadan, Nigeria | 2023

BSc Mathematics | Lagos State University, Nigeria

ADDITIONAL INFORMATION

Technical Interests: AI applications in public services, data governance, analytics automation, and digital transformation in the third sector and NHS.

Volunteering: Active involvement in community support and mentoring initiatives in Aberdeen.
